

Knitted Bags

The pre-knitted wire is supplied in tubular form so to make the bag all you need to do is sew up the closed end, make a decorative hem at the open end, and attach a small strap. The bags are a beautiful way to present small gifts such as an item of jewellery wrapped in coloured tissue.

The Green Bag - is made from close weave 0.2mm pre-knitted wire and some 0.315mm wire.

The closed end has been stitched shut using the 0.315mm wire;

A 1cm beaded turn back has been created at the open end of the bag;

The strap has been made by twisting together 5 strands of the 0.315mm wire and incorporating a few feature beads along the length.

The Red Bag – is made from 0.2mm pre-knitted coarse weave wire, lined with 0.1mm pre-knitted wire and the handle has been made with several strands of soft-flex covered with seed beads.
