

Blue-Tooth Necklace

- 1 Prepare the needle with 1.8m of single thread with a keeper bead 10cm from the end. Add a clasp bead as shown in the Straight-Stringing instructions (fig 1).
- 2 Thread on 2S and 1C. Repeat this sequence until the row is long enough for your neck - make sure you have used an odd number of C beads.
- 3 Add a bead loop to the end as in the Straight-Stringing instructions (fig 2).
- 4 Find the middle C bead and count 8C back towards the needle. Pass the needle through the beads of the long row to emerge from this 8th C bead.
- 5 Thread on 1S, 1C and 1S. Pass through the 8th C bead in the same direction as before to make the first tooth (fig g).
- 6 Pass through the next 2S and 1C on the main row. Referring to the ladder stitch instructions add 1C to this C bead on the main string. Add 1S, 1C and 1S to this new C bead as in step 5 (fig h). Pass the needle back up the new tooth and through the next 2S and 1C on the main row (fig i).
- 7 Make the next tooth here adding 2C beads in plain ladder stitch and the 3rdC with 1S to either side as before.

try different patterns of long and short teeth (see the necklace made with the Shiny Patchwork Mix below)

- 8 Repeat this process adding 1C extra to each tooth until you reach the middle C bead on the main string. Now reduce the teeth by 1C at a time. Pass the needle backwards and forwards along the main string twice to make it strong turning the needle through the clasp ends a before finishing off the thread ends.

this combination of Shiny Patchwork Mix and silver lined crystal seed beads really sparkles.

Rainbow Bracelet

Make this in the same way as the Smoky Tones Three-Row Necklace with as many extra rows as you want. We've added a few spikes (see fig f) to alternate S beads to add a bit more texture to one of the rows.

Right-Angle Weave

Thread on 1C, 1S, 1C, 1S, 1C, 1S, 1C and 1S. Pass the needle through the first 1C, 1S, 1C, 1S and 1C (fig 7). You will have made a square.

Thread on 1S, 1C, 1S, 1C, 1S, 1C and 1S. Pass the needle through the C bead on the edge of the previous square to make a new square (fig 8).

Pass the needle through the first 1C, 1S, 1C, 1S and 1C of the new square to be ready to start the next square (fig 9). Repeat figs 8 and 9 until the work is long enough.

Little Boxes Bracelet

- 1 Prepare the needle with 1.5m of double thread and tie a keeper bead 10cm from the end.
- 2 Thread on 1C, 3S, a clasp bead and 4S. Pass the needle back through the first S bead of the 4S and the clasp bead. Thread on 3S.
- 3 Pass through the C bead in the same direction as before (fig j) to form a triangular shaped support for the clasp bead.

- 4 This C bead is the first bead of the right angle weave - see the Right-Angle Weave instruction box - and note the first yellow C bead in fig 7.
- 5 Starting with 1S, 1C, 1S, 1C, 1S, 1C and 1S complete the first square as in fig 7. Now work the rest of the length following figs 8 and 9.
- 6 Make a triangular shape support for the bead loop at the far end as for the clasp bead in fig j.
