or order project pack SEL396

You will also need a pair of flat-faced pliers, an extra pair of pliers to help to open the jump rings and scissors

Difficulty Rating

4/10

working with thonging,
jump rings and lace ends

Making The Bracelet

1 Prepare the Charms - Attach a 4mm jump ring to each of the angel fish and whelk shell pendants.

Cut the thonging into eight equal lengths ready to add the beads.

2 Divide the crystal beads into eight piles. Divide the pendants between the piles - perhaps put two pendants in one pile and move an extra large crystal bead to the pile without a pendant so the beads are well assorted.

3 Thread the Strands - Using the 1A to space the crystal beads and the pendants thread up the eight strands.

4 Securing the Strands - Attach the lace ends to the strands to create one set of three strands and one set of five strands.

Link the lace ends together in pairs using a 4mm jump ring at each end. Add the clasp with a 4mm jump ring to one end and the 6mm jump ring to the other.
